Front Right Shoulder

Front Left Shoulder

Back Right Shoulder

Back Left Shoulder

Front Right Elbow

Front Left Elbow

What is OBERD?

About OBERD

OBERD is a web-based software that allows orthopedic care teams to offer patients the convenience of completing medical questionnaires electronically.

Provide one of our patient service representatives with your email and/or cell phone number to complete these forms from your home.

Patient-Reported Outcomes

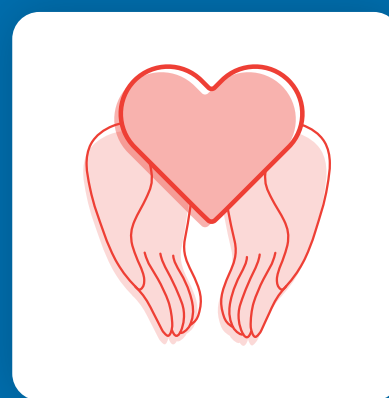

Standardized outcome forms are being used by physicians around the world to collect patient-reported data.

Medical institutions use this data to improve their medical practice, raising the standard of care for the whole world.

Care Pathway

During your recovery, we will be sending you brief surveys to be completed by your next appointment.

Receive the Best Care

The information you provide will help us make good decisions about the best treatment for you.

Predict & Prevent

By providing us with up-to-date information, we can handle unexpected complications that may require immediate attention.

Why am I filling out these questionnaires?

These questionnaires allow you to take an active role in your recovery by providing up-to-date information about your condition.

This will allow your care team to evaluate your recovery path and help you receive the best care.

Why am I being asked the same questions?

Each questionnaire provides a different score for a unique timepoint in your recovery.

Relative to your health, your answers may be different because time has passed since your surgery or start of treatment.

Will my information remain confidential?

Yes, OBERD is HIPAA and HITRUST compliant. Your data is encrypted once it is entered into the system.
